

.....

Do you have the flexibility in your logistics scheduling which allows you to respond swiftly to operational issues?

Our integrated approach helps you manage schedule deviation and the complexities of moving product through your supply chain

Integrate business process and technology to increase capacity and improve profitability.

With our experience across Australian mining, we understand that the breakdowns, operational issues and other unplanned delays can have a significant impact on your supply chain.

We know how important it is for complex logistic operations to have access to accurate and timely critical data. Quality information allows you to plan and schedule efficiently, identify issues early and avoid crippling losses caused by delays and penalties.

Ajilon offers you a unique perspective that addresses your strategic objectives, as well as your operational challenges. We do this by helping you establish smarter business platforms that combine data, process, technology and people.

If your operation needs to:

- reduce deviations in your supply chain
- improve time efficiency of operational staff
- have access to the right information at the right time to improve decision making
- maximise throughput
- be more flexible so you can meet current demand and future growth

Just some of the benefits we can deliver:

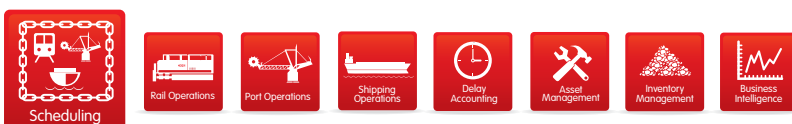

- A scheduling operation with accurate, automated reporting on maintenance and operational logistics: so you can have quick access to key data across your supply chain, with increased accuracy and reliability.
- A higher visibility of information for your operational staff: so you can manage availability and utilisation of key supply chain infrastructure, manage stock and inventory, as well as minimise delays.
- Enhanced scheduling efficiencies: so your scheduling team can reduce operational workload and have critical information available from an integrated platform, to enable your staff to focus on value add activities.

...our team can help you deliver dramatic supply chain efficiencies.

Ajilon's pragmatic approach

We take into account your strategic objectives and operational processes, then develop custom designed business architecture that addresses current organisation and technology issues and achieves your strategic objectives. We provide a methodology to combine scheduling and operational systems to enable your organisation to take advantage of accurate, real time data accessible by key stakeholders.

.....

Why choose Ajilon?

Our pragmatic approach sets us apart from the rest. Our teams across Australia work alongside yours to focus on achieving concrete business outcomes.

If you want a focus on core business outcomes:

- We consider the cost-benefit implications of collecting and integrating source data – so you can maximise its usefulness.
- We address issues of quality and accuracy – so you can identify the gaps.
- We work with you to develop architecture that supports your unique organisational culture – so you can maximise management capabilities and achieve your strategic objectives.
- We help you manage third party relationships – so you can determine what best meets your business requirements.

Our local resources, depth of experience and proven subject matter expertise means we waste no time in swinging into action ...we deliver real business outcomes sooner.

Ask us about:

- Capacity Planning, Scheduling and Deviation Management, across Rail, Port and Shipping
- Our quality assurance with PRINCE2®*, TOGAF, IIBA and industry best practice.

Let's Get Started

Ask us how we can make a difference to your organisation. Let Ajilon surprise you with a fresh new approach to tackling your challenges.

Assessing your needs: With a 12-year track record in Australian mining, we can assess your operations to identify enhancements so you can improve efficiency and profitability.

Roadmapping: We will map and build a modernisation program for your logistics scheduling, leveraging your existing assets; aligned with your strategic vision and business objectives.

Transformation: We will help you take the next step and manage your transformation program. Take advantage of our experience in business consulting, integration, customising or selecting systems across wayside, control, operational and enterprise layers.

Vendor review: We can conduct an independent review of your vendors so you can take action to improve the value you receive from these vendors.

Providing business intelligence: We can deliver dashboards, predefined reports or user driven reporting capabilities so you can leverage your existing information capability.
